Dear Co-Owners of NDP

Warning - Possible water leakage in Dream Paradise.

Recently there have been a couple of occasions of water leakage from the WC/toilet water sprayer.

The actual leakage is coming from a crack in the sprayer head. See enclosed pictures.

The Board has no information of how many apartments having the same sprayer, but it is likely that most (or all) apartments in Dream are involved.

A preventive measure would be to check the condition of the sprayer and replace as necessary.

Until then it would be wise to shut off the valve to the sprayer or the main valve to the apartment if the apartment is not occupied. Also please check your insurance for covering of water leakage.

Best Regards

Odd

on behalf of the Board
