

## Information regarding NDPC Cable TV system - 2023.

The Annual General Meeting (AGM) held the 22<sup>nd</sup> of February 2018 decided to change Cable TV provider and upgrade both buildings TV system.

**TMN Cable TV Pattaya** is the present TV signal provider, normally on a yearly based agreement. The channel selection is a standard package under TMN control only.

TMN is providing all units in NDPC with Analog and Digital TV channels. You can download the Channel guide on: [www.tmn-cabletv.com](http://www.tmn-cabletv.com)

Due to last year's several complaints from Co-Owners regarding poor signal quality and unstable TV signal, the Board decided in the Board Meeting 2022\_8 task (2-2022) to check the coaxial cable distribution for any bad connections and upgrade the system to improve the signal quality.

The 230VAC power supply to the amplifiers is also upgraded. All coaxial connectors and devices are replaced and mounted on a new sprocket on to the concrete wall. The old internal coaxial cabling is replaced by use of coaxial cable type RG6 and belonging crimp connectors.

Unfortunately, the 3<sup>rd</sup> party is only available 2 days a week for the cable TV work. At present the final commissioning is ongoing and hopefully the system is in normal operation during next week.

The scope is under control of the Board representative as observer only.

In the future only authorized persons approved by the Board will have access to the Cable TV distribution system located inside the technical rooms in the buildings.

Pratamnak, February 24, 2023.

On behalf of the Board
